24/02/25

Dear Colleague,

Neuroimmunology Price Update

We have recently reviewed the cost per test for our full Neuroimmunology repertoire, and I am writing to inform you of the updated prices. Please see attached table with details of the new pricing structure. This will be effective from 1/4/25.

Please note that there will be a change to the charging mechanism for neuronal antibodies. From 1/4/25 the Immunofluorescence and Immunoblot tests will be charged separately. As such, if you only request Immunoblot we will not routinely add Immunofluorescence. If you request Immunofluorescence and it is positive, we will continue to add on Immunoblot for confirmation.

If you have any questions, please do not hesitate to get in contact with us using the above details.

Yours sincerely,

Sylvia Arthur
Laboratory Manager
